Contact

Skilled software developer with **6 years** of experience delivering secure, scalable solutions in **.NET, Angular** and **React** on **Azure** and **AWS**. Expertise in improving efficiency, streamlining processes, and enabling team collaboration.

Kortext | Niagara Falls, Ontario (Remote)

January 2025 - August 2026 1 Year 8 Months

Software Developer

- Built features across **.NET Core** microservices on **Azure** and an **Angular / TypeScript** front end in an **Nx** monorepo, with services communicating over **gRPC** and **Kafka**.
- Won a company-wide AI hackathon** against teams across North America and Europe with an AI pull-request reviewer using **RAG** over the team's Azure DevOps Wiki standards and code, with embeddings in **PostgreSQL**.
- Shipped changes through **Azure DevOps** CI/CD pipelines, with **Argo CD** deploying services to **Kubernetes**.
- Load-tested services with **Grafana k6**, and end-to-end user flows with **Artillery** and **Playwright**.
- Set up **Transloco** internationalization and delivered **WCAG 2.2** accessibility improvements in the Angular monorepo.
- Point of contact for university customers, including the University of Oxford, on support inquiries and bug fixes.

BIS Safety Software | Sherwood Park, Alberta

December 2020 - December 2024 4 Years

Intermediate Full Stack Developer June 2023 - December 2024

- Built an AI chatbot agent using **Pinecone** through Retrieval-Augmented Generation (**RAG**), reducing support inquiries by **50%**.
- Designed and deployed a **Node.js** WebSocket server on **AWS EC2** for user session tracking, reducing database load by **30%** and improving system stability by **eliminating long polling**.
- Built an AI form generator with the **OpenAI API** that creates forms from a prompt or an uploaded PDF or image, cutting form creation time by **40%**.
- Led a team of developers on AI projects, streamlining workflows to cut development time by **40%**.

Full Stack Developer December 2020 - June 2023

- Implemented **RESTful APIs** and automated FTP imports, eliminating all manual data transfer tasks for clients.
- Followed **Agile** practices and ensured compliance with **SOC 2**, **PIPA** and **PIPEDA** for an application serving over **2 million users**.
- Created an optimized settings page with **React-Redux** and **Redis** caching, cutting page load times by **80%** and greatly improving the user experience.
- Spearheaded a reusable **React** component library on **NPM**, reducing UI development time by **50%** and ensuring design consistency.
- Developed a recursive drag-and-drop location tree with virtualized **React** components, handling thousands of company locations per customer without lag.

Aimsio | Calgary, Alberta (Remote)

July 2020 - October 2020 4 Months

Implementation Developer Intern

- Created custom forms for web and mobile applications using the Aimsio framework and **MySQL**.
- Improved report generation efficiency by **30%** using **SCSS** and **JavaScript**.
- Engaged with clients to understand and implement tailored solutions.

Professional Work Experience

○ Diploma, Digital Media and IT (Computer Software Development) 4.0 GPA

- Web Design/Development
- Application Development
- Mobile Development
- Database
- System Analysis
- Networking
- Software Testing
- Project Management

⚙️ AWS Certified Solutions Architect - Associate *In progress, exam October 2026*

○ Languages & Frameworks

- C# / .NET Core
- ASP.NET Core
- LINQ / EF Core
- TypeScript / JavaScript
- Python
- Java / PHP

○ Frontend

- Angular / Nx
- Transloco (i18n)
- React / Redux
- Next.js
- SASS / Tailwind

○ Backend

- Microservices
- gRPC / Kafka
- REST APIs
- Node.js

○ Databases

- SQL Server
- PostgreSQL
- MySQL / Redis
- MongoDB

○ DevOps & Cloud

- Azure
- Azure DevOps
- Argo CD
- Kubernetes
- Docker
- AWS (EC2, S3)
- Git / GitHub Actions
- Jira / Agile

○ Testing

- Grafana k6
- Artillery / Playwright
- Code Reviews / Unit Testing

○ AI

- RAG / Embeddings
- OpenAI / Gemini APIs
- Claude Code / Cursor
- GitHub Copilot

Skills

○ NOZARIA - Retail Platform for a Jewelry Business nozaria.com

- Built three apps for a jewelry retailer selling in Canada, the US and India: a **Next.js** admin and **REST API** on **PostgreSQL (Supabase, Drizzle)**, an offline-first **Flutter** point-of-sale app, and a headless **Shopify** storefront.
- Kept one-of-a-kind stock accurate across the shop, Etsy and Shopify with absolute stock counts and Shopify **webhooks**.
- Added **AI** virtual try-on and AI-generated product listings with the **Gemini** and **OpenAI** APIs.
- Integrated **Razorpay** payment webhooks and imported the full Etsy sales history into the admin.
- Deployed the Canada and India regions from one shared codebase.
- Streamed the shop's CCTV to a remote TV through **Raspberry Pis** on a private **Tailscale VPN**, working around the ISP's carrier-grade NAT.

○ Chatbot Agent and Knowledge Base using RAG

- Used **Pinecone** to store and retrieve embeddings efficiently, enhancing chatbot query accuracy.
- Implemented Retrieval-Augmented Generation for seamless integration of external knowledge into context-aware responses.
- Utilized event streaming for real-time markdown rendering in chatbot responses.
- Managed a Python server on **AWS EC2** for scalability and reliability. Used **AWS S3** for Knowledge Base uploads.
- Developed a modern chatbot interface with React, **Context API**, and efficient state management using local storage and session storage.

○ React Component Library using Storybook.js

- Developed a React component library on **NPM**, ensuring consistency and reducing development time.
- Eliminated duplicate components, streamlined usage, and kept the library updated.
- Integrated **Storybook.js** for interactive documentation, improving onboarding and collaboration for **70 developers**.

○ HighwayDodge - Cross-Platform Game using Java

- Developed a mobile game for **Android** and **iOS** using the **LibGDX** framework with **Android Studio** and **Java**.
- Managed game play states across screens and utilized the device gyroscope for motion and acceleration tracking.

○ LA Auto Detail - Service & Vehicle Management System

- NAIT capstone: led a team of 5 using **C#**, **ASP.NET** and **T-SQL**.
